Luxator w/stubby handle, kit with 5 luxators (1-5mm)
Luxators, sizes 1-5mm are very fine and sharp. them ideal for both canine and feline teeth. they are used and recommended by dental specialist's for cutting the periodontal ligament and expanding the alveolus (tooth socket). the stubby (shorter length and larger diameter) handle makes extraction so much safer as the users finger can be placed at the instrument tip.
Luxators are not elevator, we recommend winged elevator are used to elevate and extract the tooth.
